

Genee Vision 9100HD2

With Genee Visualisers you can make a strong impact on your audience, adding visual content to enhance your presentation by showing your content on a larger scale - in fine detail.

Utilise the GV 9100HD2's features to compare work, analyse content and show objects in greater detail. The powerful zoom enlarges source materials, pictures and 3D objects without having to force your audience to move for a better view.

A key use for Visualisers is to bring student work into lessons for peer led assessment, show and tell and discussion through collaboration.

Genee's Visualisers integrate seamlessly with our SPARK II lesson software, enabling teachers to demonstrate and interact with students in real-time; which allows teachers to create lessons that are infinitely more engaging. Alternatively, connect your visualiser to a PC and use Genee Toolbar software to annotate, take stills, zoom and more.

Setting up your Genee Visualiser couldn't be simpler; plug into a power source, connect the USB cable to your computer/screen, launch the software and you're ready to start your presentation.
