

Genee Vision 50UHD-2

With Genee Visualisers you can make a strong impact on your audience, adding visual content to enhance your presentation by showing your content on a larger scale - in fine detail.

The Genee Vision 50 UHD-2 (Ultra High Definition) is portable, lightweight and includes powerful features. This model provides 8MP output imagery through both photo and video and supports 4K output. The GV 50UHD-2 model also supports the capture of A3 size print material, making it incredibly useful when sharing students work or a double page spread of a textbook, encouraging student led collaboration.

Genee's Visualisers integrate seamlessly with our SPARK II lesson software, enabling teachers to demonstrate and interact with students in real-time; which allows teachers to create lessons that are infinitely more engaging. Alternatively, connect your visualiser to a PC and use Genee Toolbar software to annotate, take stills, zoom and more.

Setting up your Genee Visualiser couldn't be simpler; plug into a power source, connect the USB cable to your computer/screen, launch the software and you're ready to start your presentation.

Key Features & Benefits

- 

Ultra High Definition
This visualiser is UHD giving you a crisp and clear image and video output.
- 

Fixed Focus
The Genee Vision 50UHD-2 has a fixed focus lens that you don't need to worry about adjusting with each use.
- 

Image Freeze
Show a still image on the screen without any movement allowing you to annotate over it and analyse easily.
- 

Large Scale
Simply press the 'Auto' button on the side of the visualiser for auto adjustment of brightness and white balance.
- 

Lightweight & Portable
This visualiser is lightweight at just 850g, making it easy to use and very portable. Ideal for a classroom environment.
- 

Digital Zoom
With the digital zoom function you are able to expand upon the finer details of your object / document.
